E) FINANCIAL RISKS (NOTE 10)

Equity price risk

If equity securities prices had increased or decreased by 5% as at April 30, 2026, with all other variables held constant, the Fund’s net assets would have increased or decreased, respectively, by approximately \$0.2 million (October 31, 2025 – \$0.1 million). In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Interest rate risk

As at April 30, 2026 and October 31, 2025, the Fund had no significant exposure to debt instruments.

Currency risk

As at April 30, 2026 and October 31, 2025, the Fund had no significant exposure to currency risk, as all financial assets are denominated in Canadian dollars.

Credit risk

As at April 30, 2026 and October 31, 2025, the Fund was primarily invested in equity securities and had no significant exposure to credit risk, except for forward contracts where the risk is considered minimal as the counterparty has a high credit rating.

Each Fund’s financial statements include the *Schedule of Investments* at October 31, 2025 and the *Statements of Financial Position* at October 31, 2025, the *Statements of Comprehensive Income*, *Statements of Changes in Financial Position* and *Statements of Cash Flows* for the period from November 1, 2025 to April 30, 2026 (the “financial statements”).

These financial statements were approved for issuance by the Manager on June 30, 2026.

2. INVESTMENT OBJECTIVES

The purpose of each Fund is to invest the assets attributable to that Fund in accordance with the investment objectives attributable to that Fund. The investment objectives for each Fund are set out in note A in the Specific Information for each Fund.

3. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

BASIS OF PREPARATION

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The financial statements have been prepared on a going concern basis using the historical cost convention. However, each Fund is an investment entity and primarily all financial assets and financial liabilities are measured at fair value in accordance with IFRS. Accordingly, the Funds’ accounting policies for measuring the fair value of investments and derivatives are consistent with those used in measuring the Net Asset Value for transactions with shareholders.

In applying IFRS, management may make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses during the reporting periods. Actual results may differ from such estimates. The preparation of the Fund’s financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts recognized in the financial statements and disclosure of contingent liabilities. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in future periods.

Purpose has concluded that the Funds met the additional characteristics of an investment entity within IFRS 10, *Consolidated Financial Statements*.

The financial statements have been presented in Canadian dollars, which is the Funds’ functional currency.

FINANCIAL INSTRUMENTS

Upon initial recognition, financial instruments are classified as fair value through profit or loss (“FVTPL”). All financial instruments are recognized in the Statements of Financial Position when the Fund becomes a party to the contractual requirements of the instrument. Financial assets are derecognized when the right to receive cash flows from the instrument has expired or the Fund has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognized when the obligation is discharged, cancelled and expires. As such, investment purchase and sale transactions are recorded as of the trade date. Financial instruments are subsequently measured at FVTPL with changes in fair value recognized in the Statements of Comprehensive Income – Net unrealized gain (loss).

Cash and cash equivalents

Cash and cash equivalents are comprised of cash and short-term investments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Funds include in this category amounts relating to receivables in respect of amounts receivable for portfolio securities sold and other short-term receivables.

Other financial liabilities

This category includes all financial liabilities, other than those classified as fair value through profit or loss. The Funds include in this category amounts relating to payables in respect of amounts payable for portfolio securities purchased and other accrued liabilities.

A financial asset or a financial liability is recognized when a Fund becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place (regular way trades) are recognized on the trade date.

Premiums received from writing options are included in derivative liabilities and subsequently measured at fair value on the Statements of Financial Position as initial reductions in the value of investments. Premiums received from writing options that expire unexercised are recorded as realized gains and reported as Net gain (loss) on sale of investments and derivatives on the Statements of Comprehensive Income. For a closing transaction, if the cost of closing the transaction exceeds the premium received, the Fund will record a realized loss or, if the premium received at the time the option was written is greater than the amount paid, the Fund will record a realized gain and are reported as Net gain (loss) on sale of investments and derivatives. If a written put option is exercised, the cost for the security delivered is reduced by the premiums received at the time the option was written.

**NOTES TO THE FINANCIAL STATEMENTS (unaudited) (continued)****Valuation of financial instruments**

Financial assets and financial liabilities at fair value through profit or loss are recorded in the Statements of Financial Position at fair value upon initial recognition. All transaction costs such as brokerage commissions, incurred in the purchase and sale of securities for such instruments are recognized directly in profit or loss. After initial measurement, the Funds measure financial instruments that are classified as fair value through profit or loss, at fair value. Subsequent changes in the fair value of those financial instruments are recorded in unrealized appreciation (depreciation) on investments. The applicable period change in unrealized appreciation (depreciation) of investments is included on the Statements of Comprehensive Income. The average cost of portfolio investments represents the sum of the average cost of each portfolio investment. For the purposes of determining the average cost of each portfolio investment, the purchase price of the portfolio investment acquired by a Fund is added to the average cost of the particular portfolio investment immediately prior to the purchase. The average cost of a portfolio investment is reduced by the number of shares sold multiplied by the average cost of the portfolio investment at the time of the sale. The average cost per share of each portfolio investment sold is determined by dividing the average cost of the portfolio investment by the number of shares held immediately prior to the sale transaction. Transaction costs incurred in portfolio transactions are excluded from the average cost of investments and are recognized immediately in net income and are presented as a separate expense item in the financial statements. Realized gains and losses from the sale of portfolio investments are also calculated based on the average costs, excluding transaction costs, of the related investment. Loans and receivables, and other assets and liabilities (other than those classified as fair value through profit or loss) are measured at amortized cost.

The Funds' obligation for net assets attributable to holders of redeemable shares is presented at the redemption amount before discount.

The Funds measure their financial instruments, such as equities, bonds and other interest-bearing investments and derivatives, at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability.

The fair values of each specific type of investment and derivative are determined in the following manner:

Portfolio Investments

Portfolio investments listed on recognized public securities exchanges are valued using their last traded market price on the securities exchange when the price falls within the day's bid-ask spread. In the circumstance when the close or last traded price falls outside of the bid-ask spread, then fair value is determined by using bid price for long positions and ask price for short positions or a different point within the bid-ask spread that management determines to be more representative of fair value.

Securities that are not listed on any recognized public securities exchanges are reviewed individually, and the Manager uses in-house pricing models to price such securities. Manually priced securities are reviewed and approved by the valuations committee on a quarterly basis. The pricing models used by the Company are generally based on discounted cash flow valuation approach, financial statement review, and review of comparable transactions. Other valuation techniques may be used where applicable.

Derivatives

Derivative instruments are financial contracts that derive their value from underlying changes in equity prices, interest rates, foreign exchange rates or other financial or commodity prices or indices. Derivative instruments are either regulated exchange-traded contracts or negotiated over-the-counter contracts. The Fund may use these instruments for trading purposes, as well to manage the Funds' risk exposure.

Derivatives are measured at fair value. Realized and unrealized gains and losses are recorded in the Statements of Comprehensive Income.

Valuation of currency forward contracts

The Funds may enter into currency forward contracts for hedging purposes or to establish an exposure to a particular currency. Currency forward contracts are valued based on the difference between the contract forward rate and the forward bid rate (for currency held) or the forward ask rate (for currency sold short) on the valuation date. Upon the closing of a contract, the gain or loss is included in the Statements of Comprehensive Income.

Valuation of future contracts

The margin deposits with brokers relating to futures contracts are included in cash held at broker for margin on the Statements of Financial Position. Any change in the margin requirement is settled daily and is included in cash held at broker for margin on the Statements of Financial Position.

Any difference between the settlement value at the close of business on each valuation date and the settlement value at the close of business on the previous valuation date is recorded as net change in unrealized appreciation (depreciation) on futures contracts on the Statements of Comprehensive Income.

Valuation of Options

When any option is written by any Fund, the premium received by the Fund will be reflected as a liability that will be valued at an amount equal to the current fair value of the option that would have the effect of closing the position. Any difference resulting from revaluation shall be treated as an unrealized gain or loss on investment; the liability shall be deducted in arriving at the net assets attributable to holders of redeemable shares of the Fund. The securities that are the subject of a written option, if any, will be valued in the manner described above for listed securities.

Other financial assets and liabilities

All trade receivables and other accounts receivable are designated as receivables. They are recorded at amortized cost, which approximates their fair value. Similarly, all trade payables and accrued expenses are designated as financial liabilities and are recorded at amortized cost, which approximates their fair value.

INCOME RECOGNITION**Interest income for distribution purposes**

The interest income for distribution purposes shown on the Statements of Comprehensive Income represents the interest received by the Fund accounted for on an accrual basis. The Funds do not amortize premiums paid or discounts received on the purchase of fixed income securities except for zero coupon bonds which are amortized on a straight-line basis. The interest income for distribution purposes is the tax basis of calculating the interest received and which is subject to tax.

Dividend revenue

Dividend revenue is recognized when the Fund's right to receive the payment is established. Dividend revenue is presented gross of any non-recoverable withholding taxes, which are disclosed separately in the Statements of Comprehensive Income.

FOREIGN CURRENCY TRANSLATIONS

Transactions during the period, including purchases and sales of securities, income and expenses, are translated into Canadian dollars at the rate of exchange prevailing on the date of the transaction. Assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange at the reporting date.

Foreign currency transaction gains and losses on financial instruments classified as fair value through profit or loss are included in profit or loss in the Statements of Comprehensive Income as part of the "net change in unrealized appreciation (depreciation) on foreign exchange transactions".

**NOTES TO THE FINANCIAL STATEMENTS (unaudited) (continued)****CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below. The Fund based the assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Fund. Such changes are reflected in the assumptions when they occur.

Fair value of financial instruments

When the fair values of financial assets and financial liabilities recorded in the Statements of Financial Position cannot be derived from active markets, their fair value is determined using a variety of valuation techniques that include the use of valuation models. The inputs to these models are taken from observable markets where possible, but where this is not feasible, estimation is required in establishing fair values. The estimates include consideration of liquidity and model inputs related to items such as credit risk (both own and counterparty's), correlation and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments in the Statements of Financial Position and the level where the instruments are disclosed in the fair value hierarchy. The models are tested for validity by calibrating to prices from any observable current market transactions in the same instrument (without modification or repackaging) when available.

Classification and measurement of investments and application of the fair value option

In classifying and measuring financial instruments held by the Fund, Purpose is required to make significant judgments in order to determine the most appropriate classification in accordance with IFRS 9. Purpose has assessed the Fund's business model, the manner in which all financial instruments are managed and performance evaluated as a group on a fair value basis, and concluded that FVTPL in accordance with IFRS 9 provides the most appropriate measurement and presentation of the Fund's financial instruments.

TAXES

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and the assumptions made, or future changes to such assumptions could necessitate future adjustments to tax expense already recorded. The Funds establish provisions, based on reasonable estimate for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the Funds assess the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognized.

4. REDEEMABLE PARTICIPATING SHARES

The Company is authorized to issue an unlimited number of classes of non-cumulative, redeemable, convertible, non-voting shares, and one class of voting common shares which are owned by the Manager. The shares are redeemable and transferable. Each share of a series entitles the holder to the same rights and privileges in relation to any other shareholder of that series. Shareholders are entitled to vote at all meetings of all shareholders and at all meetings of shareholders of the same series as the shares held. All shares rank equally with respect to the payment of distributions. The realized and unrealized gains or losses and income and common expenses of the Fund are allocated on each valuation date to the shareholders in proportion to the respective prior day net asset value of each series of shares at the date on which the allocation is made. All series specific expenses do not require an allocation.

Common shares

The Company has issued 100 common shares for \$100. The common shares may vote at all shareholder meetings, except at a meeting of a class or series of shares. However, the common shares have no rights to dividends or distributions.

ETF Shares

The Funds have issued ETF shares as set out below:

Fund name	Ticker Symbol
Purpose RBC (RY) Yield Shares ETF	RBCY
Purpose Enbridge (ENB) Yield Shares ETF	ENBY
Purpose TD (TD) Yield Shares ETF	TDY
Purpose Shopify (SHOP) Yield Shares ETF	SHPY
Purpose Canadian Natural Resources (CNQ) Yield Shares ETF	CNQY
Purpose Scotiabank (BNS) Yield Shares ETF	BNSY
Purpose Dollarama (DOL) Yield Shares ETF	DOLY
Purpose Telus (T) Yield Shares ETF	TY
Purpose Couche-Tard (ATD) Yield Shares ETF	ATDY
Purpose Brookfield (BN) Yield Shares ETF	BNY

ETF shares may be redeemed on any trading day at 95% of their closing price on the Cboe Canada exchange, however, they will generally be able to sell ETF shares at the market price through a registered broker or dealer. Mutual Fund shares may be redeemed daily, subject to certain minimum amounts, by sending a redemption request to the shareholder's registered broker or dealer.

5. MANAGEMENT FEES, SERVICES FEES, DIRECTOR AND INDEPENDENT REVIEW COMMITTEE FEES, AND OTHER EXPENSES**MANAGEMENT FEES**

Each Fund pays the Manager a management fee for portfolio management and distribution services, as well as oversight of portfolio sub-advisory services. The management fee is based on the average daily net asset value of the shares of the applicable series. The management fee, plus applicable HST, is accrued daily and paid monthly in arrears.

The Manager may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time. In addition, the Manager may reduce the management fee borne by certain shareholders who have signed an agreement with the Manager. The Funds will pay out the amount of the reduction in the form of a management fee distribution to the eligible shareholder.

The management fees for each Fund are set out in note B in the Specific Information for each Fund.

ADMINISTRATION FEES AND OPERATING EXPENSES

The Funds will pay for all ordinary expenses ("the operating expenses") incurred in connection with the operation and administration of the Funds, including custodian and sub-custodian fees, insurance fees, transfer agency fees, filing fees, listing fees, audit fees, bank charges and interest expenses as well as other costs and expenses associated with the use of leverage, legal expenses, fees and expenses of the members of the independent review committee, income taxes, sales taxes (including GST/HST), brokerage expenses and commissions, withholding taxes, expenses incurred in connection with the valuation of a Fund's assets, investor reporting costs for annual and semi-annual financial statements, expenses in connection with the preparation of prospectus and other regulatory reports and other operating and administrative expenses incurred in connection with the day-to-day operation of the Funds. The operating expenses payable by the Funds, plus applicable HST, are calculated and accrued daily and paid monthly in arrears. The Manager may, from time to time, in its sole discretion, pay all or a portion of any operating expenses which would otherwise be payable by a Fund.

**NOTES TO THE FINANCIAL STATEMENTS (unaudited) (continued)**

The Funds are required to pay HST on management fees and administration fees charged to the Fund. In general, the HST rate depends on the residence of a Purpose Fund's shareholders at a certain point in time. Changes in existing HST rates, changes to which provinces impose HST and changes in the breakdown on the residence of a Purpose Fund's shareholders will have an impact on the management expense ratio of a Purpose Fund year over year.

DIRECTOR AND INDEPENDENT REVIEW COMMITTEE FEES

The Funds also pay the costs and any expenses related to the independent review committee ("IRC"). The compensation and other expenses of the IRC, including the costs of complying with NI 81-107, are paid by each Fund and the other investment funds managed by the manager or its affiliates for which the IRC acts as the independent review committee. Such fees and expenses include compensation payable to each IRC member and travel expenses in connection with meeting attendance. Effective January 1, 2025, each IRC member receives a fixed annual fee of \$35,000, as well as a meeting fee of \$400 per investment fund per meeting attended, subject to a maximum of \$100,000 per member per annum over all the funds managed by Purpose, for the duties they perform as IRC members in relation to the funds managed by Purpose. Other fees and expenses payable by each Fund in connection with the IRC include insurance costs, legal fees, and attendance fees for educational seminars. These retainers, fees and expenses are allocated amongst the reporting issuer investment funds managed by the manager in a manner that is fair and reasonable to such investment funds. Each Fund's share of the IRC's compensation will be disclosed in the Fund's financial statements.

In addition, each member of the board of directors for the Company receives a fixed annual fee of \$5,000 for their services as a member of the board of directors. The Company also reimburses all members of the board of directors for out-of-pocket expenses for attending meetings of the board of directors and committees of the board of directors.

6. INCOME TAXES AND WITHHOLDING TAXES

The Company qualifies and intends to continue to qualify as a mutual fund corporation under the Income Tax Act (Canada). Mutual fund corporations are generally subject to tax in the same manner as other public corporations except that income taxes payable on realized capital gains are refundable on a formula basis when shares of the Company are redeemed or capital gains dividends are paid by the Company to its shareholders.

The Company is subject to a special tax at the rate of 38 1/3% on taxable dividends received from taxable Canadian corporations. This tax is refundable to the Company upon the payment of taxable dividends to its shareholders at the rate of \$1 of tax for every \$2.61 of dividends paid.

Although the Company is comprised of a number of separate Funds, it must compute its income and net capital gains for tax purposes as a single entity. The Company has established a policy to determine how it will allocate income and capital gains in a tax-efficient manner among the Funds in a way that is fair, consistent and reasonable for shareholders.

As of December 31, 2025, the taxation year-end of the Company, the Company had no capital losses and no non-capital losses for income tax purposes. Capital losses may be carried forward indefinitely to be applied against future capital gains. Non-capital losses may be utilized to reduce taxable income over the twenty years following the year in which they arise.

The Company may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown as a separate expense in the Statements of Comprehensive Income.

7. INCREASE (DECREASE) IN NET ASSETS FROM OPERATIONS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE SHARES PER SHARE

Increase (decrease) in net assets from operations attributable to holders of redeemable shares per share of each series is calculated by dividing the increase (decrease) in net assets attributable to holders of redeemable shares from operations (excluding distributions), as reported in the Statements of Comprehensive Income, by the weighted average number of shares in issue during the related period.

8. BROKERAGE COMMISSIONS

The Manager makes decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products (including futures) and the execution of portfolio transactions. Commissions paid to brokers in connection with portfolio transactions are included in transaction costs in the Funds' Statements of Comprehensive Income. Brokerage business is allocated based on which broker can deliver to the Funds the best trade execution.

Soft dollar arrangements are when trades are allocated to brokers that provide or pay for, in addition to transaction execution, investment research, statistical or other similar services. Any soft dollar commissions are identified in the referenced footnote on the Statements of Comprehensive Income and refer to amounts paid to dealers.

9. FAIR VALUE INVESTMENTS

IFRS 13 requires disclosures relating to fair value measurements using a three-level fair value hierarchy. The level within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement. Assessing the significance of a particular input requires judgment, considering factors specific to the asset or liability. The Funds' hierarchy for disclosing the fair value of its financial instruments is based on the inputs summarized below:

- Level 1 – valuation based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities.
- Level 2 – valuation techniques based on inputs that are quoted prices of similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; inputs other than quoted prices used in a valuation model that are observable for that instrument; and inputs that are derived from or corroborated by observable market data by correlation or other means.
- Level 3 – valuation techniques with significant unobservable market inputs.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the beginning of each reporting period.

The Funds' fair value hierarchy classification of its assets and liabilities is included in Fair value measurements in the Fund-Specific Notes.

10. FINANCIAL RISKS

In the normal course of business the Funds are exposed to a variety of financial risks: equity price risk, interest rate risk, currency risk, portfolio concentration risk, credit risk and liquidity risk. The Funds' primary risk management objective is to protect earnings and cash flow and, ultimately, shareholder value. Risk management strategies, as discussed below, are designed and implemented to ensure the Funds' risks and related exposures are consistent with their objectives and risk tolerance.

Most of the Funds' risks are derived from their investments. The value of the investments within the Funds' portfolios can fluctuate on a daily basis as a result of changes in interest rates, economic conditions, commodity prices, and the market and company news related to specific securities held by a Fund. The

**NOTES TO THE FINANCIAL STATEMENTS (unaudited) (continued)**

investments are made in accordance with the Funds' risk management policies. The policies establish investment objectives, strategies, criteria and restrictions.

The objectives of these policies are to identify and mitigate investment risk through a disciplined investment process and the appropriate structuring of each transaction. Each Funds' financial risk disclosure is included in the Fund-Specific Notes.

Equity price risk

Equity price risk arises primarily from uncertainties about the future market prices of instruments held. Market price fluctuations may be caused by factors specific to an individual investment, or factors affecting all securities traded in a market or industry sector. All investments present a risk of loss of capital. The maximum risk resulting from financial instruments is equivalent to their fair value. There is a significant exposure to equity price risk arising from investment in equity securities.

Interest rate risk

Interest rate risk arises from interest-bearing financial instruments where the values of those instruments fluctuate due to changes in market interest rates.

Currency risk

Currency risk arises from financial instruments that are denominated in a currency other than the Canadian dollar, which is the Funds' functional currency. The Funds are exposed to the risk that the value of financial instruments denominated in other currencies will fluctuate due to changes in exchange rates. Currency forward contracts and options may be utilized by the Funds to hedge against currency fluctuations. The Funds' exposure to currency risk relates primarily to cash and investments which are denominated in foreign currencies, primarily US dollars.

Portfolio concentration risk

Concentration indicates the relative sensitivity of the Fund's performance to developments affecting a particular industry or geographical location. Concentrations of risk arise when a number of financial instruments or contracts are entered into with the same counterparty, or where a number of

counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions.

The Manager manages the risk through diversification and a thorough understanding of each investment in the portfolio.

Credit risk

Credit risk is the risk that a counterparty to a financial instrument fails to discharge an obligation or commitment it has entered into with a Fund.

The Funds' main exposure to credit risk is: (a) their trading of listed securities – the risk of default is considered minimal as all transactions are settled and paid for upon delivery using approved brokers; (b) their investment in debt securities through exchange traded funds because the issuer of an instrument that the exchange traded fund invests in may be unable to make interest payments or repay the principal amount on maturity. The concentration of credit risk of investments in debt instruments is minimal since the Funds invest in a variety of debt instruments issued by numerous issuers included in an exchange traded fund and (c) the Funds may enter into derivative contracts to hedge their exposure to foreign currencies. The unrealized gain loss on outstanding contracts with counterparties represents the maximum credit exposure. These contracts are carried out with counterparties with a credit rating of at least "A-". The exposure to credit risk on these contracts is considered minimal as there are few contracts outstanding at any one time and the transactions are settled and paid for upon delivery.

Liquidity risk

Liquidity risk is the risk of not being able to meet the Funds' cash requirements in a timely manner and includes the risk of not being able to liquidate assets at reasonable prices. This risk mainly arises from the Funds' exposure to daily redemptions. Sufficient notification is required for redemption requests to allow the Manager to sell investments to raise cash to fund redemptions. In addition, the Funds retain sufficient cash positions to meet their daily cash requirements. All liabilities are due within three months.

11. LEVERAGE

As alternative mutual funds within the meaning of NI 81-102, each Fund has the ability to employ leverage in an amount of up to 25% of its unlevered NAV to use for investment purposes and aggregate gross exposure, calculated as the sum of the following, which must not exceed 125% of the Fund's NAV:

- (i) the aggregate value of the outstanding indebtedness under any borrowing agreements, and
- (ii) the aggregate notional value of the Fund's specified derivative positions excluding any specified derivatives used for hedging purposes.

During the period ended April 30, 2026, each Fund employed leverage as follows:

Fund	Counterparty	Minimum Borrowed (\$)	Maximum Borrowed (\$)	Percentage of unlevered NAV borrowed	Interest rate as of April 30, 2026	Interest expense for the period ended April 30, 2026 (\$)
Purpose RBC (RY) Yield Shares ETF	Toronto-Dominion Bank ("TD")	(330,066)	(737,965)	22.9%	2.80%	7,602
Purpose Enbridge (ENB) Yield Shares ETF	National Bank Financial Inc. ("NBF Inc.")	(105,411)	(1,314,897)	18.9%	2.80%	11,520
Purpose TD (TD) Yield Shares ETF	National Bank Financial Inc. ("NBF Inc.")	(118,734)	(993,617)	20.7%	2.80%	7,957
Purpose Shopify (SHOP) Yield Shares ETF	Toronto-Dominion Bank ("TD")	(247,710)	(2,339,390)	19.9%	2.80%	21,123
Purpose Canadian Natural Resources (CNQ) Yield Shares ETF	Toronto-Dominion Bank ("TD")	(219,132)	(1,600,601)	21.3%	2.80%	13,233
Purpose Scotiabank (BNS) Yield Shares ETF	Toronto-Dominion Bank ("TD")	(109,646)	(785,409)	17.2%	2.80%	5,743
Purpose Dollarama (DOL) Yield Shares ETF	Toronto-Dominion Bank ("TD")	(364,396)	(572,628)	19.9%	2.80%	6,039
Purpose Telus (T) Yield Shares ETF	National Bank Financial Inc. ("NBF Inc.")	(524,391)	(1,884,718)	20.0%	2.80%	15,667
Purpose Couche-Tard (ATD) Yield Shares ETF	National Bank Financial Inc. ("NBF Inc.")	(317,913)	(981,458)	19.7%	2.80%	6,713
Purpose Brookfield (BN) Yield Shares ETF	National Bank Financial Inc. ("NBF Inc.")	(601,921)	(3,792,456)	21.6%	2.80%	20,327

1) Minimum amount borrowed represents the Fund's cash balance with no leverage amount borrowed.

NOTES TO THE FINANCIAL STATEMENTS (unaudited) (continued)

12. CAPITAL MANAGEMENT

The Funds considers their capital to consist of their issued and outstanding shares. The Funds are not subject to externally imposed capital requirements and have no legal restrictions on the issue, repurchase or resale of redeemable shares beyond those included in the Funds' prospectus. The capital received by a Fund is managed to achieve its investment objective of the Fund while maintaining liquidity to satisfy shareholder redemptions.

The Funds manage their capital in accordance with their investment objectives and strategies and the risk management practices outlined in note 11 while maintaining sufficient liquidity to meet distributions and redemptions. In order to manage its capital structure, the Funds may adjust the amount of dividends paid to shareholders.

Changes in the shares issued and outstanding of each series of each Fund for the period ended April 30, 2026 are reported in Fund-Specific note B, Redeemable Participating shares.

13. DIVIDENDS

The Funds expect to pay cash dividends of excess income as indicated below:

Purpose RBC (RY) Yield Shares ETF	monthly
Purpose Enbridge (ENB) Yield Shares ETF	monthly
Purpose TD (TD) Yield Shares ETF	monthly
Purpose Shopify (SHOP) Yield Shares ETF	monthly
Purpose Canadian Natural Resources (CNQ) Yield Shares ETF	monthly
Purpose Scotiabank (BNS) Yield Shares ETF	monthly
Purpose Dollarama (DOL) Yield Shares ETF	monthly
Purpose Telus (T) Yield Shares ETF	monthly
Purpose Couche-Tard (ATD) Yield Shares ETF	monthly
Purpose Brookfield (BN) Yield Shares ETF	monthly

A special year-end dividend will be paid where the Company has net taxable capital gains or where the Company needs to pay a dividend in order to recover refundable tax.

14. NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS NOT YET EFFECTIVE

The following new standard is not yet effective as of April 30, 2026 and has not been applied in preparing these financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 *Presentation of Financial Statements*. It introduces several new requirements that are expected to impact the presentation and disclosure of the financial statements. These include:

- The requirement to classify all income and expense into specified categories and provide specified totals and subtotals in the statement of profit or loss.
 - Enhanced guidance on the aggregation, location and labeling of items across the financial statements and the notes to the financial statements.
 - Required disclosures about management-defined performance measures.
- IFRS 18 is effective for annual periods beginning on or after January 1, 2027, with early adoption permitted.

The Funds are currently assessing the effect of the above standard. No other new standards, amendments and interpretations are expected to have a material effect on the financial statements of the Funds.

15. RELATED PARTY TRANSACTION

FUND MANAGEMENT ACTIVITIES

Purpose is deemed to be a related party as Manager of the Fund, often also appointing itself to such roles as trustee and/or portfolio manager. Accordingly, Purpose is responsible for the day-to-day administration of the Fund and receives a management fee in consideration for its services. No management fees or administration fees are payable by a Fund that, to a reasonable person,

would duplicate a fee payable by the underlying funds of that fund for the same service. In addition, the Fund will not pay any sales fees or redemption fees upon a purchase or redemption of securities of an underlying fund where (a) the underlying fund is managed by Purpose or an affiliate or associate of Purpose, or (b) a reasonable person would consider that fee to duplicate a fee payable by an investor in the Fund. Please refer to the "Management Fee" section for fees paid to Purpose.

Purpose has also established an Independent Review Committee ("IRC") as required by National Instrument 81-107 *Independent Review Committee for Investment Funds*. The mandate of the IRC is to review, and provide input on, the Manager's written policies and procedures that deal with conflict of interest matters in respect of the Fund. IRC members receive fees and reimbursement of expenses for services provided to the Fund and other Purpose managed funds and such costs are allocated among all the Funds on a fair and reasonable basis. The fees for services rendered to the Fund are reported in the Statements of Comprehensive Income.

The Fund is permitted to purchase, sell and hold units or shares in other investment funds for which Purpose is the manager. With respect to the purchase, sale or holdings in such units or shares, Purpose relies on standing instructions from the IRC as a positive recommendation permitting such investments subject to Purpose complying with its established policies and procedures regarding fund-on-fund investments and reporting on such compliance periodically to the IRC.
