1	Management Discussion of Fund Performance	This report may contain forward-looking statements about the fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates” or negative versions thereof and similar expressions.
3	Financial Highlights	
6	Management Fees	
7	Past Performance	In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties, and assumptions about the fund and economic factors.
8	Summary of Investment Portfolio	
10	Notice to Unitholders	
	Financial Statements	Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally; interest and foreign exchange rates; global equity and capital markets, business competition; technological change; changes in government regulations, unexpected judicial or regulatory proceedings; and catastrophic events.
11	Statements of Financial Position	
12	Statements of Comprehensive Income	
13	Statements of Changes in Net Assets Attributable to Holders of Redeemable Units	We stress that the above-mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions, and we urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next management report of fund performance.
14	Statements of Cash Flows	
15	Schedule of Investment Portfolio	
34	Schedule of Forward Currency Contracts	
34	Schedule of Swap Contracts	This management report of fund performance contains financial highlights and accompanies the financial statements of the investment fund.
34	Schedule of Futures Contracts	
35	Schedule of Option Contracts	
36	Notes to Financial Statements	You can request a copy of the investment fund’s financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure at no cost, by calling (888) 421-5111; by writing to us at Capital International Asset Management (Canada), Inc., Bay Wellington Tower, Brookfield Place, 181 Bay Street, Toronto, Ontario M5J 2T3; or by visiting our website at capitalgroup.com/ca/en/investments or SEDAR+ at sedarplus.ca .

Management Discussion of Fund Performance

Results of Operations

Performance

Units of Capital Group Multi-Sector Income Select ETF™ (Canada) advanced 0.95% after fees and expenses for the six-month period ending June 30, 2026. In comparison, a blended benchmark of five indices that reflects the sectors in which the fund invests and is hedged to Canadian dollars, also rose 0.95%. Multi-Sector Income Fund Custom Index comprises: 45% Bloomberg U.S. Corporate High Yield 2% Issuer Capped Index, 30% Bloomberg U.S. Corporate Investment Grade Index, 15% J.P. Morgan Emerging Markets Bond Index – Global Diversified, 8% Bloomberg Non-Agency CMBS Ex AAA Index and 2% Bloomberg ABS Ex AAA Index. For the same period, the Bloomberg U.S. Aggregate Bond Index (hedged to CAD) fell 0.20%.¹

Investment Environment

Credit markets were volatile in the first half of the year as shifting inflation expectations, U.S. Federal Reserve policy and the U.S.-Iran war drove changes in interest rate outlooks. Bond yields rose in the first quarter amid higher oil prices and inflation concerns, but declined in the second quarter as ceasefire talks got underway and inflation expectations moderated. Credit markets finished the period on a stronger footing with investment-grade and high-yield bonds recovering from first-quarter weakness, supported by resilient U.S. economic growth and a stable labour market. Emerging markets debt also rebounded, generating solid gains across both local- and hard-currency issuers. Securitized bonds posted modest positive returns as commercial real estate fundamentals showed signs of stabilization, though challenges persisted in some sectors.

In foreign exchange markets, the Canadian dollar fell versus the U.S. dollar, U.K. pound sterling, Swiss franc and euro while ending flat against the yen.

Contributors to / Detractors From Portfolio Returns

The mandate posted a modest positive result for the period, outpacing the Bloomberg U.S. Aggregate Bond Index, which ended slightly negative. The fund's results compared to the

custom benchmark were primarily due to strong security selection, which offset sector-level positioning.

- Investments in high-yield corporate bonds primarily drove results, as they were the top contributors over the period from a sector view. A greater-than-benchmark allocation to Braskem Netherlands Finance issues was a leading contributor.
- The securitized sector was another bright spot, as greater-than-benchmark allocations and security selection both proved additive.
- Results in the investment-grade corporate bonds sector had little impact on the overall portfolio outcome in relative terms, with investments in the sector ending virtually flat relative to the custom benchmark over the period.
- Lower-than-benchmark investments in emerging markets debt weighed on results, with underweight allocations to Bolivian and Argentine sovereign bonds the biggest detractors, as both countries' bonds rallied over the period.
- Lower-than-benchmark exposure to Petroleos de Venezuela bonds within emerging markets corporate credit also hurt relative results.

Portfolio Changes

- Over the six-month period, exposure to corporate high-yield bonds rose from 38.5% to 42.4%, while investment-grade corporate bond allocations increased from 24.9% to 27.2%.
- The allocation to securitized credit decreased from 17.5% to 12.7%, and emerging markets debt exposure rose from 10.3% to 12.2% at the end of June 2026.
- At the country level, the U.S. was the largest country exposure, at 79.5%, up from 78.2% at the end of 2025. Mexico was second largest, at 2.2%, up from 1.9% at the end of 2025.
- Investment-grade bonds (rated BBB/Baa or better) represented 45.0% of net assets at the end of the period, largely unchanged from 44.5% at the end of 2025.
- The portfolio's yield to worst² rose from 5.9% at the end of December 2025 to 6.4% at the end of June 2026. Over the six-month period, duration rose from 4.4 years to 5.0 years (lower duration is typically associated with lower risk of the portfolio losing value if interest rates were to increase).

Refer to page 2 for footnotes.

Management Discussion of Fund Performance (continued)

- The allocation to cash and cash equivalents³ and other assets less liabilities stood at 2.9% at the end of the period, down from 6.5% at the end of December 2025.

The fund's total net assets increased from \$219.8 million to \$383.2 million during the period.

Outlook

Credit markets appear positioned to build on their first-half recovery, though volatility may persist as investors assess the path of inflation, U.S. Federal Reserve policy and geopolitical developments in the Middle East. With U.S. economic growth remaining resilient and labour markets relatively healthy, investment-grade and high-yield bonds could continue to attract demand. Emerging markets debt may benefit from a more stable rate environment and improving investor sentiment, while securitized sectors could see gradual improvement as real estate fundamentals stabilize. Overall, income opportunities remain attractive, but selectivity and active risk management will likely remain important.

Recent Developments

Credit markets navigated a constructive but complex backdrop approaching midyear 2026, as resilient economic data and healthy corporate fundamentals supported income-oriented sectors. At the same time, volatility emerged periodically as investors recalibrated expectations around the timing and direction of U.S. monetary policy. Securitized credit remained a compelling opportunity through the period, offering attractive income and structural protection. With fundamentals solid, portfolio managers increased positions in lower rated emerging markets debt as higher spread opportunities emerged.

Related-Party Transactions

Capital Group is the fund manager, pursuant to an Amended and Restated Master Declaration of Trust dated May 20, 2026, as may be amended from time to time. Capital Group received management fees from the fund for the provision of managerial, supervisory and administrative services required for the day-to-day operations of the fund as set out in the Management Fees section of this report. The fund pays the Administration Fee to the fund manager in return for the fund manager paying certain operating expenses of the fund. The Administration Fee is equal to a specified percentage of the

net asset value of the fund, accrued daily and payable monthly. The fund also pays certain operating expenses directly (the "fund costs") as described in the simplified prospectus. The fund manager may, at its discretion, waive a portion or the entire amount of the Administration Fee chargeable to a fund as well as pay certain fund costs for a fund.

As of June 30, 2026, the fund manager had an investment of \$1.5 million in the fund (0.39% of the fund's NAV).

Capital Group, in its capacity as fund manager, has appointed its affiliate, Capital Research and Management Company ("CRMC") to act as portfolio advisor solely in respect of the derivatives portfolio of the fund. CRMC has also been appointed by Capital Group, in its capacity as portfolio advisor to the fund, as the investment subadvisor to the fund. In consideration for its services, CRMC received a monthly fee from Capital Group based on a percentage of the fund's daily net assets. There were no commissions or other fees paid to Capital Group for such related-party transactions during the six-month period ended June 30, 2026.

¹ Fund returns reflect the deduction of fees and expenses. Indices are unmanaged and have no expenses. Investors cannot invest directly in an index.

² Reflects the average of the lowest yield that can be realized by either calling or putting on available call/put dates, or holding a bond to maturity, of the bonds held in the portfolio.

³ Cash and cash equivalents includes short-term investments.

Financial Highlights

The following tables show selected key financial information about the fund and are intended to help you understand the fund's financial performance for the six months ended June 30, 2026, and for the past five years ended December 31, or if shorter, the period since the fund commenced operations.

The Fund's Net Assets per Unit¹

	Net Assets, Beginning of Period	Increase (Decrease) From Operations					Distributions					Net Assets, End of Period ⁴
		Total Revenue	Total Expenses	Realized Gains (Losses) for the Period	Unrealized Gains (Losses) for the Period	Total Increase (Decrease) From Operations ²	From Net Investment Income (Excluding Dividends)	From Dividends	From Capital Gains	Return of Capital	Total Annual Distributions ^{2,3}

Period from 10/22/2024 ⁵ to 12/31/2024	154,268	6,240,000	0.52	0.52	0.05	25	24.72	24.78

Refer to page 5 for footnotes.

¹ This information is derived from the fund's audited annual financial statements as at December 31 of the years shown, except 2026, which is derived from the fund's unaudited interim financial statements for the six months ended June 30, 2026.

² The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. Net assets and distributions are based on the actual number of units outstanding at the relevant time.

³ Distributions were paid in cash or certain distributions were reinvested in additional units of the fund. Immediately following such reinvestment, the number of units outstanding was consolidated so that the net asset value per unit following the distribution and reinvestment is the same as it would have been if the distribution had not been paid. Actual distributions may vary slightly due to rounding.

⁴ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

⁵ Commencement of operations.

⁶ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net assets attributable to holders of redeemable units during the period.

⁷ For the period ended June 30, 2026, the fund was of sufficient size to reasonably absorb all management fees and expenses incurred in the operations of the fund, and therefore, there were no waivers or absorptions during this period. Waivers and absorptions may be terminated at any time, but can be expected to continue for the fund until such time as the fund is of sufficient size to reasonably absorb all management fees and expenses incurred in its operations.

⁸ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets attributable to holders of redeemable units during the period. The trading expense ratio includes derivative transaction costs relating to the currency hedging.

⁹ The fund's portfolio turnover rate indicates how actively the fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

Capital Group is the fund manager, pursuant to an Amended and Restated Master Declaration of Trust dated May 20, 2026, as may be amended from time to time. In consideration for providing management services to the fund, Capital Group receives management fees.

The management fees are calculated on the amount of net assets of a fund. The annual management fee rate for the fund is 0.42%. The management fee is subject to related harmonized sales tax (HST) and other applicable taxes.

Investment Management Fees

The fund pays Capital Group a management fee for the investment advice, recommendations and services provided to the fund. This includes acting as the manager, trustee and portfolio advisor to the fund. The investment management fees paid to Capital Group are accrued daily and paid monthly. These fees are expressed as a percentage of the fund's net assets.

Past Performance

Year-by-Year Returns

The following bar charts show the performance of the fund for the six months ended June 30, 2026, and for each of the past financial years ended December 31. The bar charts illustrate how the fund’s performance has changed from year to year and show, in percentage terms, how an investment made on January 1 (or the commencement date of the fund, if later) increased or decreased by the end of the period.

The performance information shown assumes that all distributions made by the fund in the periods shown were reinvested in additional securities of the fund. The performance information does not take into account sales, redemptions, distribution or other optional charges that would have reduced returns or performance. How the fund has performed in the past does not necessarily indicate how it will perform in the future.

Notes to Financial Statements

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

1. Organization

Capital Group Multi-Sector Income Select ETFTM (Canada) ("the fund") is an exchange-traded fund listed as CAPM on Toronto Stock Exchange ("Exchange"), established as an open-ended mutual fund trust under the laws of Ontario by an Amended and Restated Master Declaration of Trust dated May 20, 2026, as may be amended from time to time. The trustee of the fund is Capital International Asset Management (Canada), Inc. ("Capital Group"). Capital Group also serves as the fund manager and has appointed its affiliate company, Capital Research and Management Company ("CRMC"), as investment subadvisor to the fund. CRMC and Capital Group are wholly owned by The Capital Group Companies, Inc.

The address of the fund's registered office is Suite 3100, Bay Wellington Tower, Brookfield Place, 181 Bay Street, Toronto, Ontario M5J 2T3.

The investment objective of the fund is to seek to provide a high level of current income through investments primarily in a broad range of bonds and other debt securities. The fund's secondary objective is capital appreciation.

The date of commencement of operations for the fund's series of units is October 22, 2024.

2. Basis of Presentation

These financial statements have been prepared in compliance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The Board of Directors of the manager and trustee approved the statements on August 24, 2026.

3. Summary of Material Accounting Policies

In May 2024, the IASB issued targeted amendments to IFRS 9 and IFRS 7 related to classification and measurement of financial instruments. The amendments include clarifying the date of recognition and derecognition of some financial assets and liabilities, with an optional exception relating to early derecognition for financial liabilities that are settled using an electronic payment system. The effective date for these amendments is for annual periods beginning on or after January 1, 2026. The manager continues to assess the impact of the amendments for the annual period ending December 31, 2026 but does not expect any substantial impact from these new requirements on the fund's financial statements when adopted.

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. These financial statements include estimates and assumptions made by management that affect the reported amount of assets and liabilities as at period end, and income and expenses during the reporting period. Actual results may differ from these estimates. The fund follows the material accounting policies described below.

Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss

Classification and Presentation

Assets – The fund classifies its investments based on both the fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

Non-derivative investments are classified and presented as fair value through profit or loss on the statements of financial position.

Derivative contracts that have a positive fair value are classified as financial assets at fair value through profit or loss and presented separately in the statements of financial position.

Liabilities – Derivative contracts that have a negative fair value are classified as liabilities at fair value through profit or loss and presented separately in the statements of financial position.

As such, the fund classifies all of its investment portfolio as financial assets or liabilities at fair value through profit or loss.

The fund's obligation for net assets attributable to holders of redeemable units is presented at the redemption amount. All other financial assets and liabilities are classified and measured at amortized cost. Under this method, financial assets and liabilities reflect the amount required to be received or paid, discounted, when appropriate, at the contractual interest rate.

Recognition, Derecognition and Measurement

Regular purchases and sales of investments are recognized on the trade date – the date on which the fund commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognized at fair value.

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or the fund has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the statements of comprehensive income within net change in unrealized appreciation (depreciation) on investments in the period in which they arise.

Transfers Between Levels of the Fair Value Hierarchy

Transfers between Level 1 and Level 2 of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period. Certain securities trading outside North America may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading.

To-Be-Announced Securities

To-Be-Announced securities ("TBA") are included in financial assets and liabilities at fair value through profit or loss, where applicable. These securities are typically sold one to three months in advance of issuance, prior to the identification of the underlying pools of mortgage securities but with the interest payment provisions fixed in advance. The underlying pools of mortgage securities are identified shortly before settlement and must meet certain parameters. As such, the TBA securities that do not have a known maturity date as at period end are displayed with TBA at the maturity date. A TBA transaction typically does not designate the actual security to be delivered and only includes an approximate principal amount; however, delivered securities must meet specified terms defined by industry guidelines, including issuer, rate, and current principal amount outstanding on underlying mortgage pools. The fund enters into a TBA transaction with the intent to take possession of or deliver the underlying mortgage-backed security ("MBS"), where applicable. Losses may arise due to changes in the value of the underlying securities or if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic or other factors.

Security Transactions and Related Investment Income

Interest for distribution purposes from fixed income investments, including short-term investments, is recognized on an accrual basis at the contractual interest rate. The fund does not amortize premiums paid or discounts received on the purchase of debt securities except for zero coupon bonds which are amortized, using the effective interest rate. Interest receivable is shown separately in the statements of financial position based on the instruments' stated rates of interest. The cost of investments represent the amount paid for each security and is determined using the average cost method, excluding commissions and transaction costs. Transaction costs, such as brokerage commissions incurred in the purchase and sale of securities, are shown as a separate line item in the statements of comprehensive income and are not part of the cost of investments.

Cash

Cash comprises cash on hand and overnight deposits that are readily convertible to known amounts of cash.

Collateral

Cash collateral provided by the fund and/or received from the counterparty is identified in the statements of financial position. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or repledge the collateral, the fund classifies that asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or repledge, a disclosure of the collateral provided is made in the notes to the financial statements.

Currency Translation

The fund's subscriptions and redemptions are denominated in Canadian dollars, which is also the functional and presentation currency. The functional currency is the currency of the primary economic environment in which the fund operates, or where mixed indicators exist in the primary economic environment, the currency in which it primarily raises capital.

Assets and liabilities, including investment securities, denominated in foreign currencies are translated into Canadian dollars at the exchange rates supplied by one or more pricing vendors on the valuation date. Purchases and sales of investments and income and expenses are translated into Canadian dollars at the exchange rates on the dates of such transactions. On the accompanying financial statements, the effects of changes in exchange rates on investment securities are included with the net realized gain or loss on investments and change in unrealized appreciation or depreciation in value of investments in the fund's statements of comprehensive income. The realized gain or loss and unrealized appreciation or depreciation resulting from all other transactions denominated in currencies other than Canadian dollars are disclosed separately.

Forward Currency Contracts

The fund may enter into forward currency contracts, which represent agreements to exchange currencies on specified future dates at predetermined rates. The fund enters into these contracts to manage its exposure to changes in foreign exchange rates arising from investments denominated in foreign currencies. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from possible movements in exchange rates. On a daily basis, unrealized appreciation or depreciation for forward currency contracts is recorded in the fund's statements of financial position as unrealized appreciation and/or depreciation on forward currency contracts. Realized gains or losses are recorded at the time the forward currency contract is closed or offset by another contract with the same broker for the same settlement date and currency. Closed contracts that have not reached their settlement date are included in the respective receivables or payables for closed forward currency contracts in the fund's statements of financial position. Realized gains or losses from closed forward currency contracts and the change in unrealized appreciation or depreciation in value of forward currency contracts are recorded in the fund's statements of comprehensive income.

Notes to Financial Statements (continued)

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

Index-Linked Bonds

The fund has invested in index-linked bonds, which are fixed income securities whose principal value is periodically adjusted to a government price index. Over the life of an index-linked bond, interest is paid on the adjusted principal value. Increases or decreases in the principal value of index-linked bonds are recorded as interest for distribution purposes in the fund's statements of comprehensive income.

Swap Contracts

Interest Rate Swaps

The fund may enter into interest rate swap contracts, which are agreements to exchange one stream of future interest payments for another based on a specified notional amount. Typically, interest rate swaps exchange a fixed interest rate for a payment that floats relative to a benchmark or vice versa. The fund uses interest rate swaps to manage the interest rate sensitivity of the fund by increasing or decreasing the duration of the fund or a portion of the fund's portfolio.

Upon entering into an interest rate swap contract, the fund is required to deposit cash, U.S. government securities or other liquid securities, which is known as "initial margin." Generally, the initial margin required for a particular interest rate swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract.

On a daily basis, the fund records daily interest accruals related to the exchange of future payments as a receivable and payable in the fund's statements of financial position. The fund may also pay or receive a "variation margin" based on the increase or decrease in the value of the interest rate swaps, including accrued interest, and records variation margin on interest rate swaps in the statements of financial position as collateral due from or due to counterparties. In addition, the fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. The fund records net accrued interest, and records realized gains and losses on any gain or loss recognized at the time the interest rate swap is closed or expires. Swap income/expense (net), net realized gains or losses, as well as any net change in unrealized appreciation or depreciation, from interest rate swaps are recorded in the fund's statements of comprehensive income. The upfront premiums paid (received) are initially recorded as assets (liabilities) and subsequently marked to market to reflect the current value of swaps.

Credit Default Swap Indices

The fund may enter into centrally cleared credit default swap agreements on credit indices ("CDSI") that involve one party (the protection buyer) making a stream of payments to another party (the protection seller) in exchange for the right to receive a specified return upon the occurrence of a credit event, such as a default or restructuring, with respect to any of the underlying issuers (reference obligations) in the referenced index. The fund uses credit default swaps to assume exposure to a diversified portfolio of credits or to hedge against existing credit risks.

CDSI are portfolios of credit instruments or exposures designed to be representative of some part of the credit market, such as the high-yield or investment-grade credit market. CDSI are generally traded using standardized terms, including a fixed spread and standard maturity dates, and reference all the names in the index. If there is a credit event, it is settled based on that name's weight in the index. The composition of the underlying issuers or obligations within a particular index may change periodically, usually every six months. A specified credit event may affect all or individual underlying reference obligations included in the index, and will be settled based upon the relative weighting of the affected obligation(s) within the index. The value of each CDSI can be used as a measure of the current payment/performance risk of the CDSI and represents the likelihood of an expected liability or profit should the notional amount of the CDSI be closed or sold as of the period end. An increasing value, as compared to the notional amount of the CDSI, represents a deterioration of the referenced indices' credit soundness and a greater likelihood of risk of default or other credit event occurring as defined under the terms of the agreement.

Upon entering into a centrally cleared CDSI contract, the fund is required to deposit with a derivatives clearing member ("DCM") in a segregated account in the name of the DCM an amount of cash, U.S. government securities or other liquid securities, which is known as "initial margin." Generally, the initial margin required for a particular credit default swap is set and held as collateral by the clearinghouse on which the contract is cleared. The amount of initial margin required may be significantly modified from time to time by the clearinghouse during the term of the contract. Securities deposited as initial margin are designated on the investment portfolio.

On a daily basis, interest accruals related to the exchange of future payments are recorded as a receivable and payable in the fund's statements of financial position. The fund also pays or receives a "variation margin" based on the increase or decrease in the value of the CDSI, and records variation margin in the statements of financial position. In addition, the fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. The fund records net accrued interest, and records realized gains and losses on any gain or loss recognized at the time the swap is closed or expires. Swap income/expense (net), net realized gains or losses, as well as any net change in unrealized appreciation or depreciation, from credit default swaps are recorded in the fund's statements of comprehensive income. The upfront premiums paid (received) are initially recorded as assets (liabilities) and subsequently marked to market to reflect the current value of swaps.

Option Contracts

The fund may enter into option contracts, which give the purchaser of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the instrument underlying the option) at a specified exercise price. The writer of an option on a security has the obligation, upon exercise of the option, to cash settle or deliver the underlying currency or instrument upon payment of the exercise price (in the case of a call) or to cash settle or take delivery of the underlying currency or instrument and pay the exercise price (in the case of a put).

By purchasing a put option, the fund obtains the right (but not the obligation) to sell the currency or instrument underlying the option (or to deliver the cash value of the instrument underlying the option) at a specified exercise price. In return for this right, the fund pays the current market price, or the option premium, for the option. The fund may terminate its position in a put option by allowing the option to expire or by exercising the option. If the option is allowed to expire, the fund will lose the entire amount of the premium paid. If the option is exercised, the fund completes the sale of the underlying instrument (or cash settles) at the exercise price. The fund may also terminate a put option position by entering into opposing close-out transactions in advance of the option expiration date.

The features of call options are essentially the same as those of put options, except that the purchaser of a call option obtains the right (but not the obligation) to purchase, rather than sell, the underlying currency or instrument (or cash settle) at the specified exercise price. The buyer of a call option typically attempts to participate in potential price increases of the underlying currency or instrument with risk limited to the cost of the option if the price of the underlying currency or instrument falls. At the same time, the call option buyer can expect to suffer a loss if the price of the underlying currency or instrument does not rise sufficiently to offset the cost of the option.

The writer of a put or call option takes the opposite side of the transaction from the option purchaser. In return for receipt of the option premium, the writer assumes the obligation to pay or receive the exercise price for the option's underlying currency or instrument if the other party to the option chooses to exercise it. The writer may seek to terminate a position in a put option before exercise by entering into opposing close-out transactions in advance of the option expiration date. If the market for the relevant put option is not liquid, however, the writer must be prepared to pay the exercise price while the option is outstanding, regardless of price changes. Writing a call option obligates the writer to, upon exercise of the option, deliver the option's underlying currency or instrument in return for the exercise price or to make a net cash settlement payment, as applicable. The characteristics of writing call options are similar to those of writing put options, except that writing call options is generally a profitable strategy if prices remain the same or fall. The potential gain for the option seller in such a transaction would be capped at the premium received.

Option contracts can be either equity style (premium is paid in full when the option is opened) or futures style (premium moves as part of variation margin over the life of the option, and is paid in full when the option is closed). For futures style options, on a daily basis for both purchased and written options, the fund pays or receives variation margin based on the premium paid and the daily fluctuation in market value, and records variation margin in the statements of financial position. Realized gains or losses are recorded at the time the option contract is closed or expires. The net realized gains or losses and net change in unrealized appreciation or depreciation from futures style options are recorded in the fund's statements of comprehensive income.

Futures Contracts

The fund may enter into futures contracts, which provide for the future sale by one party and purchase by another party of a specified amount of a specific financial instrument for a specified price, date, time and place designated at the time the contract is made.

Upon entering into futures contracts, and to maintain the fund's open positions in futures contracts, the fund is required to deposit with a futures broker, or Futures Commission Merchant ("FCM"), in a segregated account in the name of the FCM an amount of cash, U.S. government securities, suitable money market instruments, or other liquid securities, known as initial margin. The margin required for a particular futures contract is set by the exchange on which the contract is traded to serve as collateral, and may be significantly modified from time to time by the exchange during the term of the contract. When initial margin is deposited with brokers, a receivable is recorded in the fund's statements of financial position.

On a daily basis, the fund pays or receives variation margin based on the increase or decrease in the value of the futures contracts and records variation margin on futures contracts in the statements of financial position. In addition, the fund segregates liquid assets equivalent to the fund's outstanding obligations under the contract in excess of the initial margin and variation margin, if any. The fund records realized gains or losses at the time the futures contract is closed or expires. Net realized gains or losses and net change in unrealized appreciation or depreciation from futures contracts are recorded in the fund's statements of comprehensive income.

Offsetting of Financial Assets and Financial Liabilities

Financial instruments are presented at net or gross amounts in the statements of financial position depending on the existence of intention and legal right to offset opposite positions of such instruments held with the same counterparties. Amounts offset in the statements of financial position are transactions for which the fund has legally enforceable rights to offset and intends to settle the positions on a net basis. Amounts not offset in the statements of financial position relate to transactions where a master netting arrangement or similar agreement is in place with a right to offset only in the event of default, insolvency or bankruptcy, or where the fund has no intention of settling on a net basis.

Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units

The increase (decrease) in net assets attributable to holders of redeemable units is calculated by dividing the increase (decrease) in net assets attributable to holders of redeemable units by the weighted average number of units outstanding during the period. Refer to Note 11 for the calculation.

Fees and Expenses

The fund is responsible for all reasonable expenses related to its administration, management and operation. Expenses as set out in the statements of comprehensive income comprise fees incurred for the administration and management of the fund. Administration fees include such fees as custodian, transfer agent, legal, audit, security holder reporting and Independent Review Committee costs. The trustee of the fund holds sole legal title to all property of the fund in trust for the unitholders.

The manager pays certain operating expenses of the fund in exchange for the payment by the fund of a fixed-rate annual administration fee. Refer to Note 8 for more information.

Notes to Financial Statements (continued)

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

The manager may, at its discretion, authorize a reduction in the administration fee, management fee and operating expenses that it charges with respect to any individual investor's units in a fund. To effect such a reduction, the manager may reduce the administration fee, management fee and operating expenses charged to the fund with respect to the particular investor's units and pay a corresponding amount to the investor as a special distribution (a "management fee distribution"). Management fee distributions are paid first out of net income and net realized capital gains, and thereafter out of capital. The income tax consequences of management fees distributions made by the fund generally will be borne by the investors receiving the management fee distributions.

Redeemable Units

The fund's redeemable units have been classified as financial liabilities under IAS 32 Financial Instruments: Presentation ("IAS 32"). The judgement related to this classification is described in Note 7 of this report.

Accounting standards issued not yet effective

The International Accounting Standards Board (IASB) issued IFRS 18, Presentation and Disclosure in Financial Statements on April 9, 2024, which will replace IAS 1, Presentation of Financial Statements. This new standard, effective for annual periods beginning on or after January 1, 2027, aims to improve financial statement comparability and transparency by introducing a more structured statement of comprehensive income. Key changes include new categories for income and expenses (operating, investing, and financing), defined subtotals like operating profit, and requirements for management-defined performance measures. It is anticipated the fund's classification of income and expenses, particularly within the operating category, will be impacted. The manager is actively assessing the implications of IFRS 18 and its impact on the fund's financial statements and disclosures.

4. Fair Value Measurement

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as at the measurement date. The fair value of financial assets and liabilities traded in active markets are based on quoted market prices as at the close of trading on the reporting date. The fund uses the last trade market price for both financial assets and liabilities where the last traded price falls within that day's bid-ask spread. In circumstances where the last trade price is not within the bid-ask spread, the fund's manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances.

Methods and inputs – The following methods and inputs are used to establish the fair value of its financial assets and liabilities. Use of particular methods and inputs may vary over time based on availability and relevance as market and economic conditions evolve.

Equity securities are generally valued at the official closing price of, or the last reported sale price on, the exchange or market on which such securities are traded, as at the close of business on the day the securities are being valued or, lacking any sales, at the last available bid price. Prices for each security are taken from the principal exchange or market in which the security trades.

Fixed income securities, including short-term investments purchased with more than 60 days left to maturity, are generally valued at prices obtained from one or more pricing vendors. Vendors value such securities based on one or more of the inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed income securities in which the fund is authorized to invest. However, these classifications are not exclusive, and any of the inputs may be used to value any other class of fixed income security.

Fixed Income Class	Examples of Standard Inputs
All	Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and other reference data (collectively referred to as "standard inputs")
Corporate bonds, debentures & notes; convertible securities (including loans)	Standard inputs and underlying equity of the issuer
Bonds & notes of governments & government agencies	Standard inputs and interest rate volatilities

When deemed appropriate to do so (such as when vendor prices are unavailable or not deemed to be representative), fixed income securities will be valued in good faith at the mean quoted bid and ask prices that are reasonably and timely available (or bid prices, if ask prices are not available) or at prices for securities of comparable maturity, quality and type.

Securities with both equity and fixed income characteristics, or equity securities traded principally among fixed income dealers, are generally valued in the manner described above for either equity or fixed income securities, depending on which method is deemed appropriate.

Forward currency contracts are valued based on the spot and forward exchange rates supplied by third-party pricing vendors.

Swaps are generally valued using evaluated prices obtained from third-party pricing vendors who calculate these values based on market inputs that may include the yields of the indices referenced in the instrument and the relevant curve, dealer quotes, default probabilities and recovery rates, other reference data, and terms of the contract.

Exchange-traded options and futures are generally valued at the official closing price for options and official settlement price for futures on the exchange or market on which such instruments are traded, as of the close of business on the day such instruments are being valued.

Securities and other financial assets for which representative market quotations are not readily available or are considered unreliable are fair valued as determined in good faith under fair value guidelines. Fair valuation guidelines are followed to consider relevant principles and factors when making fair value determinations. Relevant indications of value are considered that are reasonably and timely available to it in determining the fair value to be assigned to a particular security, such as the type and cost of the security; restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; significant events occurring after the close of trading in the security; and changes in overall market conditions. Fair valuations and valuations of investments that are not actively trading involve judgment and may differ materially from valuations that would have been used had greater market activity occurred.

In addition, the closing prices of equity securities that trade in markets outside North American time zones may be adjusted to reflect significant events that occur after the close of local trading but before the net asset value of each series of the fund is determined.

Classifications – The fund classifies its assets and liabilities into three levels based on the inputs used to value the assets or liabilities. Level 1 values are based on quoted prices in active markets for identical securities. Level 2 values are based on significant observable market inputs, such as quoted prices for similar securities and quoted prices in inactive markets. Certain securities trading outside North America may transfer between Level 1 and Level 2 due to valuation adjustments resulting from significant market movements following the close of local trading. Level 3 values are based on significant unobservable inputs that reflect the fund manager's determination of assumptions that market participants might reasonably use in valuing the securities. The valuation levels are not necessarily an indication of the risk or liquidity associated with the underlying investment. The following is a summary of the types of inputs used in valuing the fund's investments carried at fair value:

June 30, 2026	Level 1	Level 2	Level 3	Total
Assets				
Equity investments	\$ 855,994	\$ –	\$ –	\$ 855,994
Fixed income investments	–	371,145,225	–	371,145,225
Short-term investments	–	7,220,490	–	7,220,490
Total investment portfolio	855,994	378,365,715	–	379,221,709
Forward currency contracts	–	40,072	–	40,072
Swap contracts	–	946,104	–	946,104
Futures contracts	444,206	–	–	444,206
Option contracts	310	–	–	310
Total investments	\$ 1,300,510	\$ 379,351,891	\$ –	\$ 380,652,401
Liabilities				
Forward currency contracts	\$ –	\$ 182,151	\$ –	\$ 182,151
Swap contracts	–	70,607	–	70,607
Futures contracts	889,240	–	–	889,240
Total investments	\$ 889,240	\$ 252,758	\$ –	\$ 1,141,998
December 31, 2025	Level 1	Level 2	Level 3	Total
Assets				
Fixed income investments	\$ –	\$ 205,541,088	\$ –	\$ 205,541,088
Short-term investments	–	10,955,608	–	10,955,608
Total investment portfolio	–	216,496,696	–	216,496,696
Forward currency contracts	–	432,202	–	432,202
Swap contracts	–	553,523	–	553,523
Futures contracts	129,667	–	–	129,667
Option contracts	26,773	–	–	26,773
Total investments	\$ 156,440	\$ 217,482,421	\$ –	\$ 217,638,861
Liabilities				
Forward currency contracts	\$ –	\$ 5,057	\$ –	\$ 5,057
Futures contracts	108,937	–	–	108,937
Option contracts	14,283	–	–	14,283
Total investments	\$ 123,220	\$ 5,057	\$ –	\$ 128,277

All fair value measurements above are recurring. The carrying values of cash and cash equivalents, receivables, payables and the fund's obligation for net assets attributable to holders of redeemable units approximate their fair values due to their short-term nature.

Notes to Financial Statements (continued)

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

5. Management of Risks Associated With Financial Instruments

The fund's activities may expose it to a variety of financial risks associated with financial instruments, including market risk (foreign exchange risk, interest rate risk and price risk), concentration risk, credit risk and liquidity risk. The manager seeks to minimize potential adverse effects of these risks on the fund's performance by employing professional, experienced portfolio managers, by daily monitoring of the fund's position and market events, by diversifying the investment portfolio within the constraints of the investment objective and periodically, as appropriate, by using forward currency contracts to hedge certain risk exposures.

Market Risk

Economies and financial markets throughout the world are highly interconnected. Economic, financial or political events, trading and tariff arrangements, wars, terrorism, cybersecurity events, natural disasters, public health emergencies (such as the spread of infectious disease) and other circumstances in one country or region could have impacts on global economies or markets. As a result, whether or not the fund invests in securities of issuers located in or with significant exposure to the countries affected, the value and liquidity of the fund's investments may be negatively affected by developments in other countries and regions.

Foreign exchange risk – Foreign exchange risk arises from financial instruments that are denominated in foreign currencies. The fund is exposed to the risk that the value of securities denominated in foreign currencies will fluctuate due to changes in exchange rates. When the value of the Canadian dollar falls in relation to foreign currencies, then the value of foreign investments rises. When the value of the Canadian dollar rises, the value of foreign investments falls.

The fund held securities denominated in foreign currencies during the reporting period. Other financial assets (including dividends, interest receivable and receivables for investments sold) and financial liabilities (including payables for investments purchased) that are denominated in foreign currencies do not expose the fund to significant foreign exchange risk.

The tables below indicate the foreign currencies to which the fund had exposure, including the notional amounts of forward currency contracts, if any, and currency translations. When individual currencies held are less than 1% of net assets in absolute value, that currency has been included in "foreign currencies individually less than 1%". The tables also illustrate the potential impact on the net assets attributable to holders of redeemable units if the Canadian dollar had strengthened or weakened by 5% in relation to each of the other currencies, with all other variables held constant. Monetary includes cash, short-term investments, fixed income investments, derivative instruments and currency translations, and non-monetary includes equity investments.

June 30, 2026	Exposure				Impact
	Currency	Monetary	Non-Monetary	Forward Currency Contracts	Total
	United States dollar	\$ 378,436,703	\$ 855,994	\$(383,783,850)	\$ (4,491,153)
	Other foreign currencies individually less than 1%	2,622,868	–	(2,685,336)	(62,468)
	Total foreign currencies	\$ 381,059,571	\$ 855,994	\$(386,469,186)	\$ (4,553,621)
	% of net assets attributable to holders of redeemable units	99.45%	0.22%	(100.86)%	(1.19)%

December 31, 2025	Exposure				Impact
	Currency	Monetary	Non-Monetary	Forward Currency Contracts	Total
	United States dollar	\$ 213,837,898	\$ –	\$(216,500,687)	\$ (2,662,789)
	Other foreign currencies individually less than 1%	2,978,286	–	(3,061,819)	(83,533)
	Total foreign currencies	\$ 216,816,184	\$ –	\$(219,562,506)	\$ (2,746,322)
	% of net assets attributable to holders of redeemable units	98.63%	0.00%	(99.88)%	(1.25)%

Interest rate risk – Interest rate risk is the risk that the market value of the fund's interest-bearing financial instruments will fluctuate due to changes in market interest rates.

The fund has direct exposure to interest rate changes on the valuation and cash flows of its interest-bearing assets and liabilities. However, it may also be indirectly affected by the impact of interest rate changes on the earnings of certain companies in which the fund invests and impact on the valuation of certain over-the-counter derivative products that use interest rates as an input in their valuations model.

The table below summarizes the fund's exposure to interest rate risks on investments, including interest rate swaps and futures contracts, by remaining term to maturity. The table also illustrates the approximate decrease or increase in net assets had prevailing interest rates increased or decreased by 1%, with all other variables held constant.

Term to Maturity	Total Exposure	
	June 30, 2026	December 31, 2025
<1 year	\$9,711,583	\$11,445,545
1-3 years	24,597,654	10,216,711
3-5 years	66,796,475	39,341,355
>5 years	276,550,950	155,517,143
Total	\$377,656,662	\$216,520,754
Impact on net assets attributable to holders of redeemable units	\$18,882,833	\$9,526,913
Percentage impact on net assets attributable to holders of redeemable units	4.9%	4.3%

The fund's sensitivity to interest rate fluctuations was estimated using the weighted average duration of the bond portfolio. In practice, actual results may differ from this sensitivity analysis, and the difference may be material.

Price risk – Price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether caused by factors specific to an individual investment, its issuer, or all factors affecting all instruments traded in a market and/or market segment. All securities present a risk of loss of capital. The maximum risk resulting from financial instruments is equivalent to their fair value. The fund has no significant direct exposure to other price risk as fixed income securities make up the majority of its portfolio.

In practice, the actual results may differ from this sensitivity analysis, and the difference may be material.

Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the fund. The fair value of fixed income securities includes consideration of the creditworthiness of the issuer. The carrying amount of investments represents the maximum credit risk exposure as at period end. This also applies to other assets as they have a short-term settlement. To help mitigate the credit risk and default risks of securities in the fund's portfolio, the fund manager maintains a diversified portfolio, conducts a credit analysis of each issuer and monitors broad economic trends and corporate and legislative developments. Additionally, the fund manager carefully monitors the creditworthiness and operational robustness of counterparties that conduct transactions on behalf of the fund.

All other receivables, amounts due from brokers, cash and short-term deposits are held by parties with a credit rating of AA/Aa or higher.

As at June 30, 2026, and December 31, 2025, credit ratings for fixed income investments are as follows:

By Rating

(Assigned by Credit Rating Agencies Standard & Poor's, Moody's and/or Fitch)	June 30, 2026	December 31, 2025
AAA/Aaa	2.3%	3.4%
AA/Aa	7.3	7.3
A	11.7	13.0
BBB/Baa	23.2	20.7
BB/Ba	24.5	20.7
B	19.8	17.9
CCC/Caa and below	5.6	6.1
Other	0.0 ¹	0.0 ¹
Unrated ²	2.7	4.4
Cash and cash equivalents ³ and other assets less liabilities	2.9	6.5
Percentage of net assets attributable to holders of redeemable units	100.0%	100.0%

¹Amount less than 0.1%.

²Securities in the "Unrated" category have not been rated by a rating agency; however, the fund's investment subadvisor performs its own credit analysis and assigns comparable ratings that are used for compliance with applicable investment policies. The majority of unrated securities have been assessed by the fund's investment subadvisor to have credit quality consistent with BBB/Baa rated securities. The BBB/Baa rating is the lowest rating a bond can have and still be considered investment-grade. An investment-grade bond is a bond considered to have a relatively low risk of default.

³Cash and cash equivalents includes short-term investments.

Derivative risk – Derivative instruments are generally subject to counterparty credit risk; however, in some cases, derivatives may pose counterparty risks greater than those posed by cash securities. The use of derivatives involves the risk that a loss may be sustained by the fund as a result of the failure of the fund's counterparty to make required payments or otherwise to comply with its contractual obligations. For some derivatives, the value of the instrument may be dependent on both the individual credit of the fund's counterparty and on the credit of one or

Notes to Financial Statements (continued)

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

more issuers of any underlying assets. If the fund does not correctly evaluate the creditworthiness of its counterparty and, where applicable, of issuers of any underlying reference assets, the fund's investment in a derivative instrument may result in losses. Further, if the fund's counterparty were to default on its obligations, the fund's contractual remedies against such counterparty may be subject to applicable bankruptcy and insolvency laws, which could affect the fund's rights as a creditor and delay or impede the fund's ability to receive the net amount of payments that it is contractually entitled to receive. The fund will adhere to restrictions intended to mitigate these risks by entering into certain derivative instruments with counterparties that meet specified rating requirements under applicable securities legislation. Refer to Note 6 for more information.

Concentration Risk

Concentration risk arises as a result of the concentration of exposures within the same category. The following is a summary of the fund's concentration risk:

Geographic Allocation	June 30, 2026	December 31, 2025
Equity investments		
United States	0.2%	0.0%
Fixed income investments		
Canada	0.6	0.5
Emerging markets	9.5	8.2
Europe ex-UK	3.2	2.5
Japan	0.6	0.5
Other	2.2	1.7
Pacific Basin ex-Japan	0.3	0.6
United Kingdom	1.2	1.3
United States	79.3	78.2
Short-term investments	1.9	5.0
Forward currency contracts	(0.1)	0.2
Swap contracts	0.2	0.3
Futures contracts	(0.1)	0.0 ¹
Option contracts	0.0 ¹	0.0 ¹
Other assets, less liabilities	1.0	1.0
Percentage of net assets attributable to holders of redeemable units	100.0%	100.0%

¹Amount less than 0.1%.

Liquidity Risk

Liquidity risk is the possibility that investments in a fund cannot be readily converted into cash when required. The fund will endeavour to maintain sufficient liquidity to meet expenses and redemption of units by investing primarily in liquid securities. However, unexpected heavy demand for redemptions of units could result in the fund having to dispose of investments at a time when it is not optimal in order to meet such redemption requests. To manage the fund's overall liquidity and enable the fund to meet its obligations, the assets of the fund are invested primarily in securities that are traded on active markets and that the fund manager believes can be readily disposed of through market facilities under normal circumstances. Additionally, sufficient cash and cash equivalents are maintained to fund anticipated redemptions.

The fund's liabilities are payable within three months, except for certain derivative financial instruments of \$70,607, which are payable greater than three months. Net assets attributable to holders of redeemable units are due on demand.

Designated Broker/Dealer Risk

Only designated brokers and dealers may engage in creation or redemption transactions directly with the fund. The fund has a limited number of institutions that may act as designated broker or dealer. If designated brokers or dealers exit the business or are unable to or elect not to engage in creation or redemption transactions, and no other designated broker or dealer engages in such function, units may trade at a premium or discount to net asset value ("NAV") and/or at wider intraday bid-ask spreads and possibly face trading halts or delisting. If a purchasing designated broker or dealer is unable to meet its settlement obligations, the resulting costs and losses will be borne by the fund.

Trading Price of Units Risk

Units may trade in the market at a premium or a discount to the NAV per unit. There can be no assurance that units will trade at prices that reflect their NAV per unit. The trading price of the units will fluctuate in accordance with changes in the fund's NAV, as well as market supply and demand on the Designated Exchange.

6. Rights of Offset

The fund has entered into master netting agreements with certain counterparties for forward currency contracts, where on any date amounts payable by each party to the other (in the same currency with respect to the same transaction) may be closed or offset by each party's payment obligation. If an early termination date occurs under these agreements following an event of default or a termination event, all obligations of

each party to its counterparty are settled net through a single payment in a single currency ("close-out netting"). For financial reporting purposes, the fund does not offset financial assets and financial liabilities that are subject to these master netting agreements in the statements of financial position.

The following tables present the fund's over-the-counter derivative instruments by counterparty that are subject to master netting agreements but that are not offset in the fund's statements of financial position. The net amount column shows the impact of offsetting on the fund's statements of financial position as at June 30, 2026, and December 31, 2025, if close-out netting was exercised:

Counterparty	Gross Amounts Recognized in the Statements of Financial Position	Gross Amounts Not Offset in the Statements of Financial Position and Subject to a Master Netting Agreement			Net Amount
		Available to Offset	Non-Cash Collateral	Cash Collateral	
June 30, 2026					
Assets

7. Redeemable Units

The fund offers one series of units designated as ETF units, which are sold on a continuous basis. The fund is permitted to issue an unlimited number of series of units, and an unlimited number of units of each series. All orders to purchase units directly from the fund must be placed through or by designated brokers or dealers. On any trading day, a designated broker or a dealer may place a subscription order for the Prescribed Number of Units ("PNU") or an integral multiple of the PNU of the fund. If a subscription order is received by the fund at or before the applicable cut-off time, or such other time prior to the Valuation Time ("4:00 p.m. Eastern time") on such trading day, and the fund will generally issue the PNU (or an integral multiple thereof) within one trading day from the effective date of the subscription order. The dealer or designated broker must deliver subscription proceeds consisting of a basket of securities and cash in an amount sufficient so that the value of the basket of securities and cash delivered equal the net asset value of the applicable PNU of the fund on the effective date of the subscription order. The effective date of a subscription order is the trading day on which the valuation that applies to such subscription order takes place.

On any trading day, unitholders of the fund may redeem (i) units of the fund for cash at a redemption price per ETF unit equal to 95% of the closing price for the units on the Designated Exchange on the effective day of the redemption, subject to a maximum redemption price per ETF unit equal to the series NAV per unit of the units on the effective day of redemption, less any applicable exchange and redemption fee determined by the manager, in its sole discretion, from time to time, or (ii) a PNU of the fund or a multiple PNU of the fund for cash equal to the net asset value of that number of units of the fund less any applicable exchange and redemption fee determined by the manager, in its sole

Notes to Financial Statements (continued)

(unaudited) (Amounts in Canadian dollars unless otherwise stated)

discretion from time to time. Such reduced redemption price causes cash flows on redemptions to not be substantially based on net asset value and thus the units are classified as financial liabilities in accordance with the requirements of IAS 32.

Unitholders of the fund may exchange the applicable PNU (or an integral multiple thereof) of the fund on any trading day for baskets of securities and/or cash, subject to the requirement that a minimum PNU be exchanged.

Summary of redeemable units issued and outstanding for the six months ended June 30:

	2026	2025
Units outstanding – beginning of period	8,800,000	6,240,000
Subscriptions	7,120,000	680,000
Redemptions	(320,000)	(80,000)
Units outstanding – end of period	15,600,000	6,840,000

As at June 30, 2026, Capital Group held 0.39% of the fund (June 30, 2025 – 74.05%).

As at June 30, 2026, Capital Group World Bond Select ETF held 1.79% of the fund (June 30, 2025 – 4.07%).

As at June 30, 2026 and December 31, 2025, the closing market price of the fund's redeemable units listed on the exchange, was \$24.62 and \$25.03, respectively.

8. Related-Party Transactions

Fund Management and Fees

Capital Group is the fund manager, pursuant to an Amended and Restated Master Declaration of Trust dated May 20, 2026, as may be amended from time to time. In consideration for providing management services to the fund, Capital Group receives management fees. The fund pays Capital Group a management fee for the investment advice, recommendations and services provided to the fund. This includes acting as the manager, trustee and portfolio advisor to the fund.

The management fees are calculated on the amount of net assets of a fund. The annual management fee rate for the fund is 0.42%. The management fee is subject to related harmonized sales tax (HST) and other applicable taxes.

The manager has implemented a fixed-rate annual administration fee (the "Administration Fee") for the fund. In consideration for the payment of the Administration Fee, the manager pays all of the operating expenses of the fund, other than certain specified fund costs. The Administration Fee is in addition to the management fee. The Administration Fee is equal to a specified percentage of the net asset value of the fund, accrued daily and payable monthly. The Administration Fee rate for the fund is 0.05%. The Administration Fee is subject to HST and other applicable taxes. The manager may, at its discretion, waive a portion or the entire amount of the Administration Fee chargeable to the fund as well as pay certain fund costs for the fund.

Independent Review Committee Fees

The total remuneration paid to members of the Independent Review Committee by the fund during the six months ended June 30, 2026, was \$5,373 (June 30, 2025 – \$5,616) and consisted primarily of fixed fees.

9. Taxation

The fund qualifies as a mutual fund trust under the provision of the Income Tax Act (Canada). The fund distributes sufficient net taxable investment income and net capital gains to its unitholders, such that no income tax is payable by the fund. Such income is taxable in the hands of the unitholders. As a result, the fund has determined that it is in substance not taxable and therefore, does not record income taxes and accordingly, does not recognize the deferred tax benefit of capital and non-capital losses. Net investment income, if applicable, is distributed monthly and capital gains, if applicable, are distributed annually.

The capital loss carryforward was \$6,025,902 and \$1,447,003 at December 31, 2025 and December 31, 2024, respectively. Capital losses have no expiry. The fund has no non-capital loss carryforwards.

The fund may incur withholding taxes and capital gain taxes imposed by certain countries on investment income and capital gains. Such income and capital gains are recorded on a gross basis, and the related withholding taxes and capital gain taxes are shown as a separate expense in the statements of comprehensive income and as a liability on the statements of financial position. If applicable, the fund records an estimated deferred tax liability based on unrealized gains to provide for potential capital gain taxes payable upon the sale of these securities. The fund may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. These reclaims are recorded when the amount is known and there are no significant uncertainties on collectability.

10. Client Brokerage Commissions

Subject to certain criteria, the subadvisor to the fund may execute portfolio transactions with broker-dealers who provide certain brokerage and/or investment research services to it, either directly or through a commission sharing arrangement. Such services may include, among other things, reports and other communications regarding individual companies, industries, countries and regions, economic and political and legal developments. There were no commission sharing arrangements to report for the six months ended June 30, 2026 and June 30, 2025.

11. Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units

The increase (decrease) in net assets attributable to holders of redeemable units for the six months ended June 30 is calculated as follows:

2026			2025		
Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units	Weighted Average Units Outstanding During the Period	Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit	Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units	Weighted Average Units Outstanding During the Period	Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit
\$3,309,920	12,110,055	\$0.27	\$6,050,534	\$6,584,309	\$0.92
